

ANNOUNCING: GALBRAITH FELLOWSHIP FOR 2010

In 1994 John and Rosemary Galbraith started an endowment for a fellowship that supports one Eckerd student, either a rising Junior (current Sophomore) or Senior (current Junior), to participate in a research project at the Bermuda Institute of Ocean Sciences (BIOS), formerly the Bermuda Biological Station for Research (BBSR) over the summer.

The internship pays travel to Bermuda and all expenses associated with a 10-week stay at the Bermuda Institute for Ocean Science (BIOS), plus a stipend of \$2000.00.

Applicants should submit a brief statement of research interests, transcripts, one letter of recommendation from a faculty member (other than Brooks, Szelistowski or Meylan) and a C.V. to Professor Meylan before 8 March 2010. The final selection is made by BIOS faculty and will depend in part on matching interests of the intern with the interests of faculty at BIOS. Therefore it will be necessary for applicants to familiarize themselves with the research programs of the BIOS faculty by using the BIOS web site <<http://www.bios.edu/>>. Students in all disciplines are encouraged to apply. This fellowship is open only to Eckerd students but its existence does not exclude Eckerd students from consideration for other BIOS internship programs.

for more information contact Professor Meylan at meylanpa@eckerd.edu or contact Kelli Barr, the 2009 Galbraith Fellow, at barrkr@eckerd.edu
