

The 2006 Mendelblatt Team Race  
Hosted by the University of South Florida Bulls

Conditions:

Saturday we had South winds ranging from 10kts and building all day to 18kts with even stronger gusts. The winds kicked up a steep chop making the rotation difficult. Temperatures stayed in the mid-60s with clouds cover increasing throughout the day. We finished 19 races of the 42 planned and headed in for the day when a major front hit from the northwest.

Sunday we had Northwest winds at a steady 18 to 19kts and gusting to 25kts. We had very light chop with the offshore breeze and therefore very few breakdowns when compared with Saturday. Temperatures were in the low 50s. The 30 races for the double round-robin were completed along with a final four double round-robin (12 races).

I'd like to thank my race committee team (USF Sailors) for doing an outstanding job this weekend. In addition thanks for assistance from Jim Terkelson from Eckerd College and to Brendan Shaddock(sp?) Tufts '05 we had a great time running the event, see you next year.
